NEW RIVER OFFERS WORKSHOP ON MODERN COMPUTING

[LEWISBURG, WV] Computers are a part of our everyday lives. From surfing the internet to taking care of a little business, many of us use one of these modern marvels on a daily basis. But how much do you really know about the machine you rely on so dearly or its importance to society?

New River Community and Technical College will be offering a six-week, 12-session, “Introduction to Modern Computing,” beginning in June. This course is for those who want to learn how to use a computer more efficiently. It offers both beginners and active computer users solid information to help better understand the importance of computers in today’s society and how they really work.

Instructor Dustin Dixon has broken the course down into two main areas. The first area will help you as users understand how to identify and manipulate computer hardware. The second area will help you understand how to control your computer using a variety of software applications such as antivirus software, Internet Explorer and other internet browsers, Microsoft Windows and many other software applications.

“Modern Computing” will be meet every Tuesday and Thursday for six weeks for a total of 12 sessions, beginning June 1 (June 1, 3, 8, 10, 15, 17, 22, 24, 29, July 1, 6, 8), from 2-4 p.m. in Jefferson Office Park in Lewisburg, WV. The cost of the class is $100. Preregistration is required by May 17. Seating is limited. To register, or for more information, please contact the New River Department of Workforce Education at 304-647-6570 or 304-872-4520.
