New River Offers Online Course in Creating Web Pages

Create and post your very own website through an extensive, hands-on, six-week online course offered by New River Community and Technical College and ed2go.

Students will first learn about the capabilities of the World Wide Web and the fundamentals of web design. Then, with the instructor's patient guidance, they will plan the content, structure and layout of a Web site, create pages full of neatly formatted text, build links between the pages and to the outside world, and add color, backgrounds, graphics, tables, hot buttons and animation. The course also covers critical and timely information on securing the best possible location in search engine listings, and powerful no-cost or low-cost web marketing strategies.

New sessions of Creating Web Pages start May 19, June 16 and July 21. The cost is $89. This noncredit class is open to the general public. To register, visit ed2go.com/newriver. For more information, call New River at 304-872-4520.
