"I'm Flying"

Flying dreams fall under a category of dreams where you become aware that you are dreaming, known as lucid dreaming. Many dreamers have described the ability to fly in their dreams as an exhilarating, joyful, and liberating experience.

If you are flying with ease and enjoying the scene and landscape below, then it suggests that you are on top of a situation. You have risen above something. It may also mean that you have gained a different perspective on things. Flying dreams and the ability to control your flight is representative of your own personal sense of power.

Having difficulties staying in flight indicates a lack of power in controlling your own circumstances. You may be struggling to stay aloft and stay on course. Things like power lines, trees, or mountains may further obstruct your flight. These barriers represent a particular obstacle or person who is standing in your way in your waking life. You need to identify who or what is hindering you from moving forward.

If you are feeling fear when you are flying or that you feel that you are flying too high, then it
suggests that you are afraid of challenges and of success.

In reality, we do not have the ability to fly. Thus such dreams may represent that which is beyond our physical limitations. In your mind, you can be anybody and do anything. Another way of interpreting flying dreams is that these dreams symbolize your strong mind and will. You feel undefeatable and nobody can tell you what you cannot do and accomplish. Undoubtedly these dreams leave you a great sense of freedom.
