

COVID-19 Exposure/Possible Exposure Procedure

If a student or employee is tested for COVID-19 and is positive:

Follow the reporting protocol above and complete the Certification of Illness or Quarantine Form.

Testing information regarding patients is regulated by the Health Insurance Portability and Accountability Act (HIPAA) guidelines and will be kept confidential to the extent possible under the circumstances.

If a student/employee tests positive but does not show symptoms, they will still need to isolate for ten days after the positive test. Isolation could end earlier, after two negative tests conducted at least 24 hours apart.

If a student/employee tested positive and recovered, they will need to wait ten days from the onset of symptoms, and at least three days of no fever without fever-reducing medicines, along with symptoms improving over that time.

The College will follow CDC guidelines and recommendations, so this process may be updated to reflect any changes. This is an interactive process and all students and employees are expected to comply with the campus safety procedures put in place.
